Valley and Ridge
Piedmont
Coastal Plain
flying strength: weak
female dispersal: low
emergence season: winter
feeding style: shredder
habit: crawler
body size: small
respiration mode: gills
respiration mode: tegument
rheophily: depositional
rheophily: erosional
thermal preference: cold stenothermal
thermal preference: cool-warm eurythermal
thermal preference: hot eurythermal
−0.4
0
0.4
Association with biological condition (fourth-corner statistic)
below 0: more in worse-condition streams; above 0: more in better-condition streams
weighted by density
weighted by biomass
